

NATIONAL WATTLE DAY

1st SEPTEMBER 2021

Following record rainfall, local native wattles are bursting with colour in and around the Porongurup

Enjoy the 'best of show' during a memorable year of blooming magic

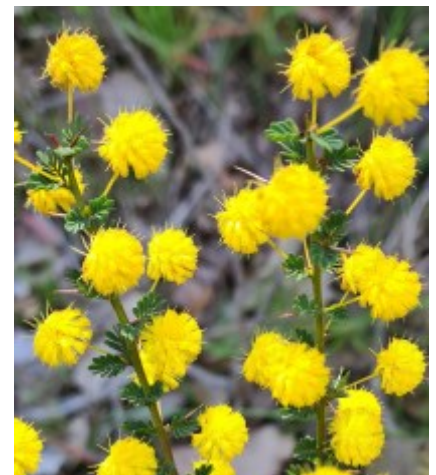

Acacia urophylla [Net-leaved Wattle] slender and erect open shrub up to 2m with creamy round flowers. Prominent ribbed ovate shaped pointy leaves.

Acacia leioderma [Porongurup Wattle]. 0.3 -1.5m open shrub with pairs of fern-like erect leaves. Groups of 1 to 3 globular long - stemmed flowers. Common understory plant in Porongurup National Park and surrounds.

Acacia drummondii [Drummond's Wattle]. Shrub, 0.3-1m high. Soft single spike of bright yellow oblong flowers which extend out from the stem. Fern-like leaves.

Acacia pulchella [Prickly Moses]. Compact shrub to 1.5m. Small fern-like pairs of leaves with axillary spines. Bright round yellow flowers.

Acacia myrtifolia [Red stemmed Wattle]. Distinctive feature is reddish stems with bright red leaf regrowth. Prominent veins along the margins and the midrib of the leaves. The cream flower clusters are globular in shape and occur on short floral sprays from the leaf axils. Bushy shrub 1-3m. Prolific along Porongurup roadsides.
