TWIN CREEKS CONSERVATION RESERVE

is one of the few remaining protected bush properties in this agricultural region and is part of the Oyster Harbour Catchment Group/ Ranges Link Project.

The Reserve is a mixture of remnant bush, revegetation and regrowth.

Varied soil types across the Reserve result in a diversity of plant communities from the Sheoak groves on granite outcrops to the flooded ironstone heath and to the lateritic Jarrah/Marri uplands.

FRIENDS OF THE PORONGURUP RANGE,

is a volunteer not-for-profit organization which purchased the 511ha farming property in 2003.

The public is welcome to visit this unique private reserve which is located on Knights Rd in the vale of Kalgan between the Porongurup and Stirling Ranges.

CONSERVATION PROJECTS

Porongurup Friends volunteers conduct on-ground activities to rehabilitate habitat by removing feral plant species and restoring native vegetation.

The habitat and populations of local flora and fauna are monitored through the Citizen Science program.

Bird surveys are conducted with assistance from Birdlife Australia, CCWA and volunteers. Observations are added to the information collected across participating regional nature reserves in the Gondwana Link.

Please leave comments in the visitor book to enable us to improve the visitor experience at the Reserve.

Out of respect for the native fauna, camping, dogs, horse riding and bikes are not permitted.

We hope you enjoy your visit to Twin Creeks as much as we enjoy being caretakers of this boodja.
